AFFAIRS IN BROOKLYN.

THE NUNS DIDN'T LOOK AT HIM. DISCHARGING A MAN ARRESTED FOR ATTACK-ING THE INMATES OF THE DOMINICAN

CONVENT. Delective-Sergeant Ihne, of the Stagg-st. police station, yesterday arrested a man answering the de-scription given by the Mother Superior of the Dominican convent attached to the Church of Our Lady of Sorrows, Morgan-ave, and Harrison Place, as the man who threw the convent into an uproor late on Saturday night by assaulting two of the sisters. When the prisoner was taken before Father Zeutgraf, the paster of the church, who frightened off the man by the discharge of his shotgun, he was unable to identify him. The man was then taken to the convent, and confronted by the Mother Superior, but she could not say that he was the can seen on Saturday night.

The sisters did not see him.

According to the statement made by Father Zeuttraf. to the detective, the sisters had not seen the face of the man, in all the time he was in the convent. notwithstanding the fact that the Mother Superior lighted the gas while the sisters were sruggling with their assailant. Father Zeutgraf explains by saying that the nuns were taught that they should not look at the face of a man under any circumstances, and for that reason did not see him. When the police found that neither Father Zeutgraf, or any of the sisters could identify the man they permitted him to have his liberty. They refused to tell his name to the

Great excitement still prevails in the neighborhood of the convent, and among the parishioners of the church. At the convent all information was refused resterday as the Mother Superior declared that too much had already been said about the case. The miscreant must have been well acquainted with the premises. After gaining an entrance to the convent by pushing back the latch of the rear basement window and raising it, he went straight to the second floor, on gaining the building, where the sisters all slept. There were also sleeping apariments on the ground floor which are occupied by the little orphans.

It was learned last evening that the man taken before Father Zeutgraf and the Mother Superior for Identification was the one who first responded to the calls for help, and aided Officer Sullivan in searching the convent for the villain. The occurrence was reported to Vicar-General May, the rector of the Holy for the stepson. Trinity Church, in Montrose near Graham-ave, and he ordered that a full report of the affair be given to the police so as to prevent distorted reports being this, the information given by the police has been rague. None of the names of the sisters can be obtained. NEWS FROM NEW-JERSEY.

JERSEY CITY.
DRINKING WATER DEFILED WITH SEWAGE. There is much complaint here of the condition of the drinking water. Jersey City receives his supply from the Passale River and has an "intake" and water works at Bellville, which is opposite the north end of the city of Newark. The water is full of sediment, a disagreeable odor comes from it too. If a glassful is permitted to stand until the sediment settles the bottom of the glass will be discolored with a brown slimy

The people who have made the subject of Passale water a study declare publicly and emphatically that it is unfit for drinking, cooking and bathing purposes They say that the cause of this filthy condition of the water is two-fold, the lew water and the unusual amount of decayed vegetation in the river and the emptying of the sewers of Pressaic into the river. Passale has about 500 sewer connections which rep-resents, according to the filed report of Inspector Henry J. Mahlor, of the Passaic water, 7,000 persons. Four or five large main sewers lead direct to the river and all the refuse of the city flows through them to the water Jersey City people drink. These sewers are flushed twice a day and to keep them clean the river is polluted. In addition to these sewers others are being constructed.

Some months ago the authorities of Jersey City and Newark jointly brought a suit in court to restrain Passaic from emptying its sewers in the Passaic River. and that has been done, except the management will last a day. As soon as the testimony taken before the commissioner appointed by the court is all nex-Senator W. D. Edwards, for Jersey City, and Colonel E. L. Price, for Newark, will submit it to the court and ask for a preliminary injunction. If this is denied there is no further hope for Passale water to be fit for use, but if the injunction is granted, then the lawyers will endeavor to have it made permanent and forever prevent Passale from polluring the water. Newark, however, need only do this until December 1, for its new aqueduct will be completed about that time. Doctors here have for a long time advised the people to boll the water before using it.

FOR AIDING A PRISONER TO ESCAPE. John Purcell, who was arrested on Sunday for sell ing pictures of the Rev. Dr. McDonald, a priest who had been removed from St. Patrick's parish, did not appear before Police Justice Kimmerly yesterday orning for examination. During the day before Purcell had succeeded in being released on bail. His bondsman was Myles McCarron, a member of the Demoeratic County Committee. McCarron interested himself in Purcell's case and found John O'Brien, a Justice of the Peace, whom he persuaded to accept him as a bondsman for Purcell, although McCarron, it is said, was not a property-owner. When Police Justice Kimmerly learned this he caused warrants to be issued for the arrest of O'Brien and McCarron, on the chare of alding a prisoner to escape. Both men gave ball to await the action of the Grand Jury.

The body of John Griffing, of Patchogue, L. I., was found at Port Liberty yesterday morning. Griffing was a cook on the yacht Oriole, of the Jersey City Vacht Club fleet. He was last seen at midnight on Friday. He was then on the deck of the yacht. It is believed he accidentally fell overboard.

They swere that they never received any bribe from the Standard Oil Company for their votes, as was inti-mated in the offending article. Mr. McKean testified that the communication which forms the basis of the libel appeared in the paper while he was absent from the city, and that he knew nothing about it. After some legal sparring between Judge Gilhooly, who appeared in place of Prosecutor Marsh, who is sick, and the defendants' counsel, Justice Rodgers announced that he would hold McKean and Story for the Grand Jury, ball being fixed at \$700 for each prisoner. DOCTORS AND THE FEVER EPIDEMIC. Leading physicians of Newark yesterday answered series of questions relative to the existence of typhoid fever in the city and agreed that the disease was of a mild type and endemic, and that the most probable cause was the use of well water. Their opinio cally disagree with the published statements of Health Physician Titus. Dr. Edgar Holden, a recognized authority in such matters, had just returned to the city yesterday. He said that there was more or less malarial and intermittent fever at this season of the year and the latter might easily be mistaken for a mild type

Ex-County Physician Howlett, who has a large practice, said he did not personally know of any fatal Most of the cases were of an exceedingly mild type and there was no real cause for alarm. Dr. Mandeville, formerly health physician, said he had made a study of typhoid fever. The disease, as it existed, was only endemic and he did not personally know of any cases of true typhoid fever. He sug-gested that all wells be closed as a matter of prevention. Dr. William O'Gorman said that the cases he and treated were all of a mild type. He thought there had been errors in diagnosis by physicians to magnify malarial complaints into typhold.

County Physician Wrightson said it was wrong to charge aqueduct water with spreading typhoid. His cases were all of a mild nature and yielded readily to treatment. The sickness was endemic. There was always danger of of a severe case of malaria being re-ported as typhoid. Dr. Arthur Ward said he had treated nine cases at St. Barnabas's Hospital and four privately. About half of these could be called serious and only one patient had died. He thought the unsensonable summer weather had much to do with the sickness. Police Surgeon Clark expressed his belief that not one-tenth of the cases reported as typhoid were anything else than intermittent or malarial fever. Dr. A. K. Baldwin said that there was no epidemic of typhoid and the cases that existed were of a mild character. Post-mortem c aminations had shown that persons who it was supposed had died from typhoid, having had some of its symptoms, did not really have

Dr. H. B. Enldwin, chemist of the State Board of Health, was in consultation with Health Physician Titus vesterday in relation to his analysis of the water of different wells. He will report to the Board of Health to-night. It was said at the office of the Board yesteriay that the reports of new cases had come in at about the same race as last week. There were no deaths reported at any of the hospitals yesterday. BRIGHT OUTLOOK FOR A REPUBLICAN VICTORY.

The call has been issued for Republican ward or-anization throughout the city, the meetings for that urpose to be held on Thursday night. Chairman ms, of the City Central Executive Committee aid yesterday that the dissatisfaction which now exists among Democrats with the administration of af-fairs by the party bosses would insure for a good Republican candidate many hundreds of Democratic otes. He was certain also that the 30,000 Repubform yours who had no representation in the Board of Works, now in control of the city, would come to the polls in October. Starty per cent of the city's expenditures was under the control of this partisan learnt, and they had no voice in the disposal of the money, the bulk of which they had paid in taxes.
